## **DETAILED ACTION**

Applicant's arguments filed April 22, 2005 have been fully considered but they are not persuasive. Claims 1-4 are pending.

Applicant has generally argued that Berchtold (5303549) considers only hydraulic fluid and the device is not workable if air is the chosen fluid. This statement is not agreed with. Berchtold describes an exemplary embodiment of the system using hydraulic fluid with the intention of supporting a heavy load (Column 1, Lines 5-15), the claims refer to the system and its components using the broad term "fluid", thus not limiting the practice of the invention to either hydraulic or pneumatic embodiments. Further it is know and well within the scope of Berchtold to use air as the operating fluid if the system were to be used for light loads, wherein evidence of this knowledge is shown in Cobb (3894476) (Column 1, Lines 3-9).

However, in light of the amendments to claim 1 requiring the piston velocity to be 2 m/s creating a pressure differential in the air container of less than 3 percent, the rejection of claim 1 has been withdrawn.

## Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-4 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant

Art Unit: 3745

art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claim 1 recites "such that with a piston velocity ... 3 percent" in lines 8-10, these limitations are not supported by the disclosure as filed. The nearest support for the limitations comes from page 4, lines 2-4, of the specification stating "the vertical movement of the piston ... a negligible quantity", however the metes and bounds of "negligible" are not clearly defined and there is no mention of a correlation to piston velocity. Claims 2-4 are rejected due to their dependence from claim 1.

## Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Application/Control Number: 10/702,163

Art Unit: 3745

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Leslie whose telephone number is (571) 272-4819. The

examiner can normally be reached on M-F 8:00am - 4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Edward Look can be reached on (571) 272-4820. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
